EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald Ingraham on May 11, 2004.

The application has been amended as follows:

Claims 18-28 have been cancelled.

The following is an examiner's statement of reasons for allowance: The amendments to the claims overcome the rejections under 35 USC 101. Specifically, by reciting the invention as a computer readable medium having instructions thereon, the invention is now fixed in a tangible medium. Also, the instructions are directed to creating an image of an object, such as a thorax or heart, and do not merely process a mathematical model. While mathematical models per se are not patentable subject matter, methods or apparatuses which use mathematical models to create a useful, concrete and tangible result are allowable. See *State Street Bank & Trust Co. v. Signature Financial Group Inc.*, 47 USPQ2d 1596 (CAFC 1998) and *Diamond v. Diehr*,

Art Unit: 3712

450 U.S. 175 (1981). The present invention as currently amended has a practical application in the technological arts. As such, it is patentable under 35 USC 101.

Also, the prior art does not disclose or suggest the claimed invention. While computer models of images of objects are known, claim 1 recites that the model is created by a plurality of basis objects, where each basis object is defined by a mathematical function, and a plurality of transformation operators which operate to define and alter relationships between the mathematical models. Aouni-Ateshian discloses a computer-readable medium for storing a mathematical model, where bodies 1 can be said to be basis objects and links 6 can be said to be transformation operators. However, Aouni-Ateshian does not disclose that each body 1 is defined by a mathematical function, as required by claim 1. The prior art does not disclose or suggest all of the limitations of claim 1. Claim 10 contains each of the limitations of claim 1. As a result, claims 1 and 10, and all claims dependent therefrom, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kurt Fernstrom whose telephone number is (703) 305-0303. The examiner can normally be reached on M-F 9:30-6:00.
